

The Fraser Health Association is looking to expand the plastic surgery group at Abbotsford Regional Hospital. The successful applicant will join two other plastic surgeons providing hospital coverage. The ideal applicants will have at least one year of post graduate training with preference shown towards a hand or breast fellowship. All applications will be considered.

The Abbotsford Regional Hospital is the tertiary care hospital for the Eastern Region of the Fraser Health Authority, B.C.'s largest and fastest growing health authority and is a level 3 trauma centre. The group is affiliated with the University of British Columbia with teaching of medical students and residents in the Fraser Valley programs. The BC Cancer Agency has a facility associated with the hospital, providing oncology support. Private clinics are also located in the region. Additional professional support is provided by an orthopedic hand surgery group and the other plastic surgeons in the health authority. Call is currently 1 in 4. A MOCAP agreement provides an on call stipend.

This area encompasses the growing city of Abbotsford, BC's 5th largest city, to the farmlands of the Fraser Valley. It is an ideal location to raise a family with a seemingly unlimited number of recreational activities, fine restaurants, and top schools. Abbotsford also has its own international airport. With its proximity to Vancouver and BC's Interior, this is a great place to live.

Applications will be accepted until June 30, 2018.

Please forward letters of interest and a copy of your CV to both:
