

Re: **Hand & Microsurgery Fellowship**  
**Division of Plastic Surgery, University of British Columbia**

University of British Columbia offers a 6 or 12 Hand & Microsurgery Fellowship. The fellowship offers a comprehensive exposure to adult elective and trauma hand and wrist surgery, as well as some exposure to pediatric hand surgery. Areas of subspecialty exposure include brachial plexus and nerve transfer surgery, tetraplegia surgery and management of the rheumatoid hand and wrist. Fellowships are based at the Vancouver-based hospitals of the University of British Columbia. Successful completion of a Royal College or American Board Certified Plastic Surgery Program or equivalent is required.

The focus of the microsurgery portion of the Fellowship is trunk and extremity reconstruction following trauma and oncologic extirpation. If applicants have specific interest in Head & Neck Reconstruction following oncologic management access to these activities are potentially available.

Financial support for this fellowship requires that the applicant be eligible for licensure (Canadian trained) in British Columbia.

Applications are now being received for upcoming positions. Please apply ~ 24 months prior to the desired date of training. Applicants are generally accepted 18-24 months prior to the January or July start date.

Erin Brown, MD, PhD, FRCSC  
Hand & Microsurgery Fellowship Director
